

FOLLOW NATURE

2018/2019

Tagart is a brand whose beginnings date back to 1996. As a family run company we have taken a path in development to realise our mission. We create innovative and functional products of highest quality by following nature.

Since the very beginning of our existence we have been striving to make our clothes feature high comfort of use and precise finish.

Today we are proud to admit that our vast experience and passion is reflected in the design of clothes which meet very strict requirements of hunting clothing.

Innovative technological solutions, best quality materials and following modern fashion trends allow our products to be appreciated among people hunting in all parts of the world.

Join them by choosing Tagart brand.
Follow nature!

Tagart ist eine Marke, deren Geschichte auf das Jahr 1996 zurückreicht. Als Familienunternehmen verfolgen wir seit Jahren den Weg der Entwicklung, um unsere Mission zu erfüllen.

Wir bilden innovative und funktionale Produkte von höchster Qualität, indem wir die Natur verfolgen

Seit dem Beginn unserer Existenz haben wir es zu unserem Zweck gemacht, dass unsere Kleidung sich durch einen hohen Komfort und präzise Herstellung auszeichnet.

Heute können wir stolz zugeben, dass unsere vieljährige Erfahrung und Leidenschaft für Aktivität in unseren Kleidugskizzen ihren Ausdruck findet, wobei unsere Kleidung die strenge Kriterien der Jagdkleidung erfüllt. Dank innovativen technologischen Lösungen, Rohstoffen bester Qualität sowie der Anpassung an aktuelle Modetrends sind unsere Produkte von Jäger weltweit hoch geschätzt.

Schließen Sie sich ihnen an, indem Sie die Marke Tagart auswählen. Folgen Sie der Natur nach!

OUR SOLUTIONS

High collar hood makes carrying weapons easy as it does not fall flat on the shoulders. Front drawcord allows for adjusting the girth to the shape of user's face, providing optimal protection, even in adverse weather conditions. Horizontal depth regulation provides good fit at the back of the hood, and a special profile allows for exposing ears.

FLEX® hood firmly holds on the head. Without limiting the range of sight it makes orientation in the field easier. Independent peak protects the eyes from rain and wind. When necessary the hood may be detached from the jacket.

UNSERE LÖSUNGEN

Die Kapuze befindet sich hoch auf dem Stehkragen. Dies erleichtert das Tragen des Gewehrs, indem die Kapuze nicht breit über die Schulter fällt. Der vordere Tunnelzug erlaubt die Anpassung des Umkreises an die Gesichtsform, wodurch der optimale Schutz, auch bei sehr ungünstigen Wetterbedingungen gesichert wird. Die senkrechte Regulierung der Tiefe erlaubt die Anpassung der Hinterseite der Kapuze und ein besonderes Profil erlaubt die Entblößung von Ohren. Die Kapuze FLEX® hält sich gut auf dem Kopf. Da das Blickfeld nicht eingeschränkt ist, erleichtert sie die Orientierung. Ein von den Tunnelzügen unabhängiger Schirm schützt die Augen vom Regen und Wind. Beim Bedarf kann die Kapuze sehr einfach abgeknöpft werden.

The system provides maintaining appropriate micro climate at a very high level. Now, thanks to ZEPHYR® system not only do you have efficient ventilation at your disposal, but also you may adjust its intensity to your current needs. The driving force of ZEPHYR® ventilation is the user's movement. Regulated ventilation slits are placed in such a way, that with every move air is sucked into areas which are most prone to sweating. In case of jackets, air slits are situated on the sides. The system is complemented with regulated outlet openings, fitted on the back of the sleeves. Trousers are fitted with ventilation slits on inner thighs. While walking, the slits act as inlet and outlet of airflow.

Looper is an innovative solution designed to fasten the internal insulating layer to the outer layer protecting from cold and rain. The system of fastening loops allows the layers of clothing for independent movement. It also ensures greater comfort of moving in difficult terrain.

By replacing a traditional zip with the Looper system we have achieved significant improvement of thermal features of the set. The airbag from naturally heated air between the layers serves as an additional insulating layer. The Looper system has been designed to improve the user's comfort in difficult terrain and low temperatures.

The key feature of professional hunting apparel is providing a low level of noise while moving. The slightest rustle may completely spoil a carefully planned hunt.

SilentXhunt is a system of solutions implemented in clothing, which is to minimise unwanted noise during a hunt.

Silent fabrics fitted in places prone to rubbing allow for more precise approach regardless of weather and terrain conditions.

Das System sichert die Aufrechterhaltung des Mikroklimas auf einem sehr hohen Niveau. Jetzt dank dem System ZEPHYR® verfügen Sie nicht nur über effiziente Belüftung, sondern Sie können auch ihre Intensität an aktuelle Bedürfnisse anpassen. Die Triebkraft von ZEPHYR® ist die Bewegung des Benutzers. Die einstellbaren Spalten des Systems ZEPHYR® befinden sich in solchen Stellen, dass bei jeder Bewegung die Luft zu den Bereichen eingesaugt wird, die dem Schwitzen am meisten ausgesetzt sind. Bei den Jacken befinden sich die Lufteingängen seitwärts. Das System wird durch regulierbaren Ausgangsspalten ergänzt, die sich auf den Rückseiten von Ärmel befinden. Bei den Hosen befinden sich die Belüftungsspalten auf den Schenkelinnenseiten. Beim Marschieren wirken die Spalten abwechselnd als Luftein- und Ausgängen.

Looper ist eine innovative Lösung, deren Aufgabe ist, die innere Wärmeschicht mit der äußeren Schutzschicht gegen Kälte und Regen zu verbinden. Das Befestigungsschlaufensystem ermöglicht eine unabhängige Bewegung der Kleidungsschichten. Es garantiert einen besseren Komfort bei der Bewegung im schwierigen Gelände.

Dank dem Austausch des traditionellen Verschlusssystems durch das Looper-System konnten wir die Thermik des gesamten Bekleidungssystems deutlich verbessern. Das Luftkissen aus natürlich erwärmter Luft zwischen den Schichten ist eine zusätzliche isolierende Schicht. Das Looper-System wurde entworfen, um Ihren Komfort im schwierigen Gelände und bei niedrigen Temperaturen zu erhöhen.

Die Schlüsselfunktion der professionellen Jagdbekleidung ist der minimale Geräuschpegel während der Bewegung. Ein Rascheln kann die mühelos geplante Jagd zerstören.

SilentXhunt ist ein System von Kleidungslösungen, dessen Aufgabe ist, unerwünschte Geräusche während der Jagd zu absorbieren.

Leise Gewebe, die in Bereichen eingesetzt werden, die der Reibung ausgesetzt sind, ermöglichen eine präzisere Annäherung, unabhängig von Wetterbedingungen und vom Gelände.

Despite wide availability of synthetic insulation materials, we take advantage of natural down insulation in particular products. Delicate natural down, featured by water fowl, contains as much as 1 million feathers per 1 kg. The down which we use comes from Polish goose farms, which are considered to be among the best in the world. Apart from excellent thermal-insulating properties, down is a perfect heat conductor. Thanks to a high level of heat capacity we experience the warmth almost instantly. High quality down retains its properties for many years. After being compressed numerous times it returns to its original shape.

Trotz der breiten Zugänglichkeit von synthetischen Isolierungsmaterialien, wenden wir bei ausgewählten Produkten die traditionelle Daunenschichten für Erwärmung. Zarte natürliche Daunen von Wasservögel enthalten eine Million Feder in einem Kilogramm. Die von uns benutzten Daunen stammen aus den polnischen Gänsezüchten, die als eine der besten der Welt gelten. Neben ausgezeichneten Dämmungseigenschaften, sind die Daunen ein exzellenter Wärmehersteller. Dank der hohen Wärmekapazität ist die Wärme sofort spürbar. Die Daunen hoher Qualität behalten ihre Eigenschaften für mehrere Jahren. Mehrmals zusammengepresst kommen immer in ihre primäre Form zurück.

Clothes designed for difficult weather and terrain conditions are fitted with polyurethane membranes, in most cases implementing additional taped seams.

After adding waterproof zips we can guarantee waterproof and windproof properties while maintaining the highest rate of breathability. Because of the nature of use we pay attention to make the layers of the set as silent as possible.

Bei der Kleidung, die für schwere Gebiets- und Wetterbedingungen bestimmt ist, wenden wir Poliuretan-Membranen an, überwiegend auch zusätzlich sind die Nahten mit Bänder zusätzlich aufgeklebt.

Nach dem Hinzufügen von wasserdichten Reißverschlüssen kann die Wasser- und Windisolierung bei der höchsten Belüftung gewährleistet werden. Wegen der Einzigartigkeit von Lösungen, weisen wir auf die maximale Dämpfung der Schichtenlayouts der Kleidung hin.

Most of our shirts are produced from cellulose fibres, sourced from the wood of deciduous trees.

Fabrics containing modal are very pleasant to the skin and touch, resistant to pilling. Modal fibres can absorb about 50% of moisture more than popular cotton. Thanks to a smooth surface of fibres it retains its softness and elasticity even after being washed numerous times, providing appropriate maintenance has been observed.

Die Mehrheit unserer Hemden wird aus Zellulose-Faden hergestellt, die vor allem aus dem Holz der Laubbäumen gewonnen werden. Die Modalstoffe sind sehr Haut-Freundlich, angenehm bei Berührung und resistent gegen Fusseln. Die Modalfäden können um 50% mehr Feuchtigkeit als populäre Baumwolle absorbieren. Dank der einzigartig glatten Fläche, behalten die Fäden bei entsprechender Konservierung ihre eigentümliche Weichheit und Elastizität auch wenn mehrmals gewaschen.

THUNDER THERMO 2+

Orttex membrane, lightweight synthetic insulation
3M Thinsulate and the possibility of attaching
additional insulation guarantees water resistance
and thermal comfort.

LOOPER
warming fastening system

Thunder Thermo 2 is available in a new Plus version for the most demanding users, giving a possibility of hunting in temperature range between +15 to -25 degrees Celsius.

Thunder Thermo 2 Plus is an expanded version of Thunder Thermo 2 set by additional insulation attached under the outer layer. Thanks to a combination of technical insulation Thinsulate and an independent warming layer the set will prove itself during a hunt in temperatures as low as -25 degrees.

Inner warming layer is attached to the outer clothing with Looper system, a system of fastening loops. Looper allows the layers of clothing for independent movement. It also ensures greater comfort while moving in difficult terrain.

By replacing a traditional zip with the Looper system we have achieved significant improvement of thermal features of the set. The airbag from naturally heated air between the layers serves as an additional insulating layer. Thunder Thermo 2 has been designed so as to meet high requirements for apparel intended for hunting in the period from early autumn to late spring. The set features Flex[®] hood. Not only does it protect from adverse weather conditions but also it gives freedom in listening out for the game. Zephyr[®] ventilation system driven by movement of the body allows for maintaining thermal comfort. The new, second version of Thunder Thermo set is fitted with a silentXhunt system in order to minimise unwanted noise. As a result, traversing the hunting grounds becomes virtually soundless.

Thunder Thermo 2 Plus version key features:

- 4 independent elements of the set
- wide range of temperatures from +15° to -25° allows hunting in the period from early autumn to late spring
- Looper insulation fastening system
- available in 5 colour versions
- fabric with Orttex membrane and taped seams
- lightweight and efficient 3M Thinsulate insulation
- Zephyr[®] ventilation system
- convenient Flex[®] system hood enables listening out for the game
- silentXhunt minimises unwanted noise

THUNDER THERMO 2

Thunder Thermo 2 set from Hunting Pro line is a model which will prove itself during an active hunt as well as while hunting from a tree seat or hunting box.

THUNDER THERMO 2 3DX MEN # LADY

THUNDER THERMO 2 FLAME MEN # LADY

THUNDER THERMO 2 SNOW MEN # LADY

Thunder Thermo 2 set is available in plain brown colour or in combination with one of four types of camouflage: 3DX, Fire, Flame, or Snow. Durable outer fabric resistant to damage while moving among sharp plants or branches. The whole is coated with a hydrophobic layer which prevents clothing from soaking with moisture. Orttext membrane featuring breathability rate of 13.000g/m²/24h and water resistance at the level of 10.000 mm. Together with taped seams they efficiently protect us from wind, rain and snowfall. The three dimensional 3DX camouflage additionally masks our presence in the hunting ground. The colour versions of the camouflage enable the user to fit the current hunting conditions.

Thunder Thermo 2 Flame with a large amount of orange colour is a solution dedicated for group hunting, when it is necessary to be clearly visible to other hunters. We paid particular attention to the design of the side which is most often exposed at the hunting post.

The camouflage pattern on the orange background is meant not to attract attention of the game. During a winter hunt, while we are moving in the snow, the ideal choice will be the Snow version in white colour. The brown set will prove itself when hunting from a tree seat or hunting box.

THUNDER THERMO 2 FIRE MEN

THUNDER THERMO 2 BROWN MEN # LADY

The jacket has been fitted with 2 spacious side pockets at the bottom, 2 ergonomic pockets at chest height with spatter proof zips and a Napoleon pocket hidden under the flap of the main front zip. The trousers feature 2 zip pockets on the sides, a capacious pocket covered with a flap on the left thigh, and a side pocket, with an ammo carrier band for 5 cartridges, on the right thigh.

Composition: 1) 68% nylon, 32% polyester, 2) 100% polyester. Insulation: 100% polyester. Lining: 94% polyester, 6% elastane. Sizes: Men: S to 4XL, Ladies: XS to 2XL.

Thunder Thermo 2 key features:

- 5 colour versions
- tailored cut, does not hinder movement
- fabric with Orttext membrane and taped seams make up for ideal protection from wind, rain and snowfall
- lightweight and efficient 3M Thinsulate insulation providing thermal comfort in low temperatures
- the Looper system allows for attaching additional insulation
- regulated Zephyr® system air vents on the sides of the jacket, back of the sleeves, and inner thighs

- convenient Flex® system hood
- silentXhunt minimises unwanted noise
- drawcord fitted in the waist and at the bottom of the jacket for optimal adjustment
- velcro regulated sleeve cuffs
- trousers with rubber waistband
- profiled knees; bottoms of legs with zips
- 2 sewn on pockets at the bottom, 2 ergonomic zip pockets, a Napoleon pocket hidden under the flap of the main front zip

Four-time finalist of European Championship in Deer Luring.
Two-time individual European Champion in Deer Luring.
Four-time team European Champion in Deer Luring.
Co-founder of Association and a member of „POLANO” Hunting Signal Group which is one of the lead groups in Poland performing hunting music on Pless and Par Force horns.
A forester by profession and passion. Active hunter.

The noble art of deer calling is a hunting discipline popular not only in Poland but also in Austria, Germany and the Czech Republic.

There are around 30 professional deer callers in Poland. In autumn, during the rutting period, animals are very agitated. A sturdy male looks after several does, being very jealous of them at the same time. It is enough to appropriately imitate a call of other deer, for example a young buck searching for a doe.

Envy incites his unrest and blunts his senses. In order to lure I use two tubes, one is made from synthetic material the second from compressed birch. It is possible to lure deer by using only your hands. Deer calling requires a lot of practice and the ability to observe nature. I encourage everyone to take up deer calling as it is a remarkable encounter with nature, very often full of unpredictable emotions.

ARCTIC EXTREME

Arctic Extreme from the Hunting Pro line is a set which will prove itself in the most difficult conditions when approaching the prey or while hunting from a tree seat.

Orttx membrane, goose down insulation characterised by high elasticity, and various advanced functional solutions make this set ideal for those who do not accept any compromise. Arctic extreme ensures thermal comfort in temperatures even to -30 degrees Celsius.

The jacket has been fitted with Flex® hood system. Not only does it protect from wind and rain but also provides an opportunity to listen out for the game. Zephyr® ventilation system is an efficient and easy to use solution fitted in both the jacket and trousers, which serves to adjust the thermal comfort of the body. It allows the air to circulate and to extract moisture in case of overheating. Thanks to a unique layout of fabrics the silentXhunt system remains silent while approaching the game in difficult terrain conditions.

The jacket and trousers are fitted with Polish goose down which features the elasticity at the level of 800 cuin. The insulation is evenly distributed in numerous small compartments. Such a solution makes the set very lightweight despite its dimensions. The braces which are connected to additional insulation of loins, are easily detachable thanks to an implemented set of zip and velcro fastenings. The outer side of sleeves and shoulders of the jacket, the back of the trousers and knees have been made from a durable resistant to damage fabric. The remaining surface is composed from a special, soft to the touch fabric, which constitutes the SilentXhunt system. Orttx membrane (breathability 13.000g/m²/24h, water resistance 10.000 mm) and taped seams efficiently protect from wind, rain and snowfall.

The jacket is fitted with a unique Flex® hood system with a standing collar. Horizontal depth regulation provides adjustment of the back of the hood and a special profile lets the user to expose the ears which enables to clearly hear what is happening in the hunting ground. The hood is insulated with a large amount of down so as to protect against exposure to cold even in the most adverse conditions.

The jacket has been equipped with 2 spacious side zip pockets at the bottom which are covered with flaps; 2 warm pockets at chest height, with spatter proof zips, to keep hands warm; a small pocket, with spatter proof zips, below the left shoulder designed to store a radio; 2 internal pockets in the lower part of the jacket. The trousers have been fitted with 2 high capacity zip pockets with ammo carrier bands for 7 cartridges additionally covered with flaps, and 2 deep profiled knee pockets.

Arctic Extreme is a set for the most demanding users. It allows for very comfortable hunting in difficult terrain and weather conditions. Recommended for use in the period from late autumn to early spring.

Composition: 1) 68% nylon, 32% polyester, 2) 100% polyester.
Insulation: 90% goose down, 10% feathers.
Lining: 94% polyester, 6% elastane. Available sizes: S to 3XL.

Arctic Extreme key features:

- ergonomic cut which does not hinder movement and raises the comfort of moving in the field
- goose down insulation featuring high elasticity of 800 cuin. Provides thermal comfort in very low temperatures
- fabric with Orttx membrane and taped seams provide perfect protection from wind, rain and snowfall.
- convenient Flex® system hood with large amount of down
- regulated Zephyr® system air vents on the sides of the jacket, back of the sleeves, and inner thighs
- stealth system silentXhunt
- drawcord fitted in the waist and at the bottom of the jacket for optimal adjustment
- velcro regulated sleeve cuffs
- leg cuffs regulated with zips
- trousers with a heightened waist
- 7 pockets in the jacket; 4 pockets in the trousers

WAVE 2 MEN # LADY

Wave 2 jacket from Outdoor Pro line is a model which may serve as an outer layer of clothing as well as a lightweight and efficient insulation worn under a jacket. The jacket features high quality goose down filling with elasticity of 800 cuin.

The jacket is designed for everyday use as well as additional insulation to be worn under a hunting set. Thanks to high down elasticity at the level of 800 cuin the jacket features high insulation parameters and takes up little storage space when folded. After having been completely folded the jacket fits in a small bag which may be packed into a small backpack. The internal side of the collar has been finished with a pleasant to the touch fabric in order to ensure greater comfort in contact with the skin.

Wave 2 jacket has been fitted with 2 zip pockets.

Versions available: men and ladies, in which the tailored cut ideally fits the womens' body. Wave 2 jacket is a high quality product designed for hunting and outdoor use.

Recommended for use in the period of early autumn to late spring.

Most important features of Wave 2 jacket:

- very lightweight - 0,285 kg Lady S size; 0,385 kg Men M size
- goose down insulation 800 cuin providing thermal comfort in very low temperatures
- collar finished with soft fabric
- drawcord at the bottom of the jacket for optimal waist adjustment
- 2 zip pockets

Composition: outer layer 100% nylon.

Insulation: 90% goose down, 10% feathers.

Sizes: Men S to 4XL. Ladies: XS to 3XL.

WING 2 MEN # LADY

Wing 2 vest from Outdoor Pro line is a model which may serve as an outer layer of clothing as well as a lightweight and efficient insulation worn under a jacket. The vest is filled with high quality Polish goose down.

Wing 2 serves as additional insulation worn under a hunting set as well as an everyday use vest. Thanks to high down elasticity at the level of 800 cuin after being compressed it takes up little storage space. Low volume of the folded vest and light weight enables it to be packed even into a small backpack.

The design of the collar, which contains additional amount of down, protects against exposure to cold and secures the neck. The internal side of the collar has been finished with a pleasant to the touch fabric in order to ensure greater comfort in contact with the skin.

Wing 2 vest has been fitted with 2 zip pockets.

Versions available: men and ladies, in which the tailored cut ideally fits the womens' body. Wing 2 vest is a high quality product designed for hunting and outdoor use. Recommended for use in the period of early autumn to late spring.

Most important features of Wing 2 vest:

- very lightweight - 0,250 kg Lady S size; 0,295 kg Men M size
- goose down insulation 800 cuin providing thermal comfort in very low temperatures
- collar design with significant amount of down
- drawcord at the bottom of the vest for optimal waist adjustment
- 2 zip pockets

Composition: outer layer 100% nylon. Insulation: 90% goose down, 10% feathers. Sizes: Men S to 4XL. Ladies: XS to 3XL.

GOMERA PRO BROWN

Gomera Pro Brown set is the next stage of evolution of the recognised by hunters Gomera Classic set. It allows for comfortable hunting in difficult terrain and weather conditions.

silent >< hunt®

GOMERA PRO BROWN # GOMERA PRO 3DX

Gomera Pro Brown from the Hunting Pro line is a set designed for hunting in difficult winter terrain and weather conditions, both when approaching the game and hunting from a tree seat. Implementation of the silentXhunt system which minimises the noise makes the hunt even more efficient. Gomera Pro Brown is a recognised model which was created on the basis of Gomera Classic. Gomera has been tested by hunters in adverse winter conditions for the last 15 years. By improving the construction and the implemented materials we have come to creating the Gomera Pro. The set is made of a durable and resistant to damage fabric which will prove itself in difficult terrain full of sharp branches or thorns.

In order to minimise unwanted noise the set has been fitted with silentXhunt system, thanks to which the hunt in the hunting grounds is virtually soundless. The user's body warmth is taken care of by a sturdy synthetic insulation, which fills both the jacket and the trousers.

The entire set is protected by Orttext membrane featuring breathability rate of 13.000g/m²/24h and water resistance at the level of 10.000 mm. Together with taped seams they efficiently protect us from wind, rain and snowfall. The jacket is fitted with a convenient hood which may be stored in the collar, a double drawcord to adjust the circumference of the jacket at waist height and at the bottom, openings at the bottom which enable comfortable sitting down in a hunting box. Additionally, it has been fitted with 2 spacious side pockets at the bottom, 2 pockets on the chest, a very big pocket at the bottom of the back and an internal pocket to store documents.

The trousers feature regulated waist, detachable adjustable braces, and legs that may be unzipped up to knee height which makes putting on shoes easier. Moreover, the trousers are fitted with 2 side zip pockets and a capacious pocket with a flap located on the right thigh.

GOMERA CLASSIC

GOMERA PRO 3DX

Gomera Classic is designed for frosty conditions without snowfall. The fabric used in Gomera Classic is extremely silent and lightweight.

The set is also available in full 3DX camouflage version which enables for greater masking among trees, leaves and branches.

Gomera Pro Brown key features:

- insulation which enables hunting in low temperatures
- comfortable cut provides full freedom of movement
- silentXhunt system minimises noise during the hunt
- fabric with Orttext membrane and taped seams make up for ideal protection from wind, rain and snowfall

- waist and bottom drawcords for optimal regulation of circumference
- velcro regulated cuffs
- openings at the bottom of the jacket for sitting down comfortably
- possibility of unzipping the legs up to the knee
- regulated waist and braces length
- 6 pockets in the jacket, 3 pockets in the trousers

Gomera Pro Brown composition:

68% nylon, 32% polyester. Membrane: 100% polyurethane. Lining: 94% polyester, 6% spandex.

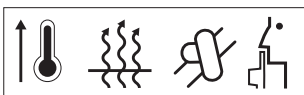

Gomera Pro 3DX composition: 100% polyester. Membrane: 100% polyurethane. Lining: 94% polyester, 6% spandex.

Gomera Classic composition: 91% polyester, 9% nylon. Lining: 94% polyester, 6% spandex.

All versions insulation: 100% polyester.

Sizes: Men: S to 3XL. Ladies: XS to 3XL

GOMERA CLASSIC MEN # GOMERA CLASSIC LADY

IRON 2

Iron 2 set from Hunting Pro line is a set designed for active hunting when approaching the prey or while hunting from a tree seat in the period from spring to summer.

Hybrid combination of a membrane and a fabric with wax coating protects from getting soaked, and at the same time provides high breathability rate.

Iron is a set fitted with comfort systems supporting the hunter during a hunt. What is exceptional about the set is the hood with Flex® system. Not only does it protect against adverse weather conditions but also it provides an opportunity to listen for the game. Zephyr® ventilation system is both an efficient and simple in use solution which allows for maintaining thermal comfort. The driving force

of the ventilation is movement of the body. Iron set is available in olive brown colour or 3DX camouflage. Elements of the 3D camouflage hide the user in the surroundings, making it difficult to be spotted by the game. Applied set of fabrics features high resistance to damage, which is vital while moving through sharp plants or branches. Additionally, the fabric provides a barrier against moisture.

Fabric with Ortex membrane provides breathability at 13.000g/m²/24h and water resistance at 10.000 mm.

Fitted on the shoulders and arms it protects from rain, whereas at the back and the bottom of the trousers the fabric secures the user from moisture while walking on wet terrain, i.e. high grass.

The jacket has been fitted with 5 zip pockets: two at the bottom, one at chest height, internal pocket for keeping documents and one functional pocket equipped with ammo carrier band on the forearm. The trousers in turn, feature 2 pockets. A spacious pocket, with snap fastening, covered with a flap on the left leg.

A zip pocket fitted with an internal ammunition carrier band for 5 cartridges on the right leg. Thanks to such solution cartridges are always easily accessible and do not make rattling noise while approaching the prey. Unique cut and length of the sleeve guarantees freedom of movement while assuming firing position. Iron is an advanced set of hunting apparel. It ensures high comfort and freedom during a hunt, even in adverse terrain and weather conditions. Specially recommended for hunting in the period of spring to autumn.

Most important features of Iron set:

- ergonomic cut which does not hinder movement while approaching the game
- a hybrid of a fabric with waterproof membrane and a breathable fabric with wax coating
- adjustable Zephyr® system air vents
- convenient Flex® system hood allows for exposing the ears
- functional ammo carrier bands fitted in trousers pocket and left forearm pockets
- velcro regulated sleeve enables assuming firing position easily
- profiled knees
- drawcord at the bottom of the jacket for adjusting the waist
- jacket - 5 pockets: 2 at the bottom, Napoleon pocket on the chest, internal pocket to keep documents and a functional forearm pocket with ammo carrier band
- trousers - 2 pockets: side pocket with ammo carrier band for 5 cartridges, side pocket with a flap.

Composition: 3DX camouflage: 100% polyester.
Olive membrane fabric: 68% nylon, 32% polyester.
Olive fabric: 65% polyester, 35% cotton. Lining: 100% polyester.

Available versions: men and ladies, which is specially tailored to women's body. Available sizes: Men XS-4XL, Ladies XS-2XL. Temperature range 5-30°C. Hunting season: spring to autumn.

IRON 2 3DX # BROWN, MEN # LADY

JOANNA SZALIŃSKA

Promoter of hunting and a member of the Regional Management Board female shooting representation in Jelenia Góra. Member of the Management Board of „Darz Bór” Hunter’s Association.

Promoter of hunting and a member of the Regional Management Board female shooting representation in Jelenia Góra. Member of the Management Board of „Darz Bór” Hunter’s Association in Jelenia Góra. Great aficionado of hunting who continues her family hunting traditions, active hunter.

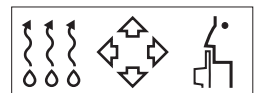

It was my dad who got me hooked on hunting. It was him who showed me what hunting is and what is behind it. It is difficult to understand this passion if one does not

have contact with nature. Hunting means discovering nature, observing its customs and becoming a part of it. When I set off for the hunting grounds I leave the rest of the world behind and I find peace. I begin to notice what I haven’t seen while rushing through a day filled with duties. I greatly appreciate it. A hunting woman, who is traditionally referred to as Diana, is a rather uncommon sight. The largest number of Dianas in the world are in the USA, as many as 20% of all hunters are women. In Norway women constitute 12%,

in Great Britain the hunting season begins after the Queen fires the first shot. In Poland Dianas constitute about 3% of all hunters, although the number is increasing. At least once a year I organise a hunt for the Diana Club, which is attended by female friends from all around Poland. We keep together and collectively experience emotions and the beauty of nature. The nature teaches sensitivity but also persistence and consequence. I encourage to get to know it and benefit from it as it is at arm’s reach.

JUMP!

Jump set from Outdoor Pro line is a lightweight reinforced set designed for active use in demanding terrain conditions. A comfortable cut and a design full of dynamic seams make the set suitable for hunting, outdoor trek, and everyday use.

Shoulders, arms, and the bottom of the jacket have been made from a durable wax finished fabric, which hinders the absorption of moisture and at the same time makes the set resistant to mechanical damage, for example while walking through bramble. The remaining part of the jacket is made from a highly elastic fabric which does not hinder movement and efficiently extracts moisture to the outside.

Trousers are also made from a durable wax finished fabric. Additionally, elements from elastic fabric are fitted on the side and below the waist to limit inconvenient moving of the trousers while bending and lifting up the knees.

Jacket with a standing collar fitted with a zip, 2 pockets to keep hands in, 2 spacious chest pockets and 2 internal side pockets. Trousers with 2 pockets to keep hands in, a zip pocket on the side and 2 flat but elastic and spacious thigh pockets with zips each fitted with 3 compartments for convenient storage.

The Jump set will prove itself perfect while performing demanding activities in terrain where high durability of clothing is indispensable. It also features a range of functional solutions which greatly increase the users' comfort.

Recommended to be worn in the period from spring to autumn.

Jump set key features:

- durable wax finished fabric fitted in places which are prone to damage and soaking
- elastic and breathable fabric increases the comfort of use
- drawcord, hidden inside the pocket, for optimal waist adjustment
- trousers fitted with a rubber waistband
- jacket features 6 pockets, trousers feature 5 pockets with 6 additional compartments in thigh pockets.

Composition:

Fabric 1 waxed: 65% polyester, 35% cotton.

Fabric 2: 79% viscose, 18% polyamide, 3% Spandex.

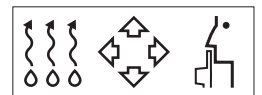

Available sizes: S-4XL.

CRAMP

Cramp set has been made from fabric which features a unique composition. It combines absorptiveness of viscose, durability of polyamide, and elasticity of Spandex.

CRAMP DESERT MEN # LADY CRAMP KHAKI MEN # LADY

The Cramp set from Outdoor Pro line is a set which has been created to provide high comfort. It will prove adequate while spending free time actively as well as during everyday use. Cramp set has been made from fabric which features a unique composition. It combines absorptiveness of viscose, durability of polyamide, and elasticity of Spandex. It is highly elastic, fitting the body well. It virtually does not limit the freedom of movement.

Jacket with a standing collar fitted with a zip, 2 side zip pockets. Trousers with 2 side pockets, 2 thigh pockets, and 1 pocket on the back, all fitted with zips.

A thick weave of fabrics protects from wind penetration. Additionally, it efficiently extracts moisture to the outside and dries quickly that is why it is ideal during increased physical activity.

The set is available in versions: men and ladies, which highlights the ladies' figure.

Cramp is an ideal choice for everyday use and hunting in the spring-summer period. It will work well during hikes in the mountains or treks through forests. It is appreciated by hunters who travel to hot Africa.

Cramp set key features:

- comfortable cut which does not hinder movement
- fits the body well
- efficiently extracts moisture and dries quickly
- drawcord at the bottom of the jacket for optimal waist adjustment
- trousers fitted with a rubber waistband
- jacket - 2 pockets, trousers - 5 pockets

Composition:

79% viscose, 18% polyamide, 3% Spandex.

Jacket sizes: Men S-4XL. Ladies: S-3XL.

Pant sizes: Men S-5XL. Ladies: XS-3XL.

European Champion

MARCIN MOŹDŹONEK

A repeatedly titled player in the international arena,
a representative of the national volleyball team.

2014 Men's Volleyball World Champion.

2009 Men's Volleyball European Champion.

From November 2011 to May 2014

a captain of the senior national team.

A repeatedly titled player in the international arena, a representative of the national volleyball team. 2014 Men's Volleyball World Champion. 2009 Men's Volleyball European Champion. From November 2011 to May 2014 a captain of the senior national team. For his exceptional sport achievements President Lech Kaczyński awarded him with Knight's Cross of the Order of Polonia Restituta. Currently a player of Asseco Resovia Rzeszów. Apart from sport his greatest passion is hunting, which he has been interested in since his childhood. An active hunter, a practitioner, who appreciates approach hunting.

In my childhood I spent a lot of time in the country, in the bosom of nature. I appreciate peace and quiet, and nature is the best remedy for stress. I am from Olsztyn, a town which is surrounded by fifteen lakes. I live there between two of them by a neighbouring forest.

Hunting has become my second passion. In order to take up hunting we need to get to know nature and its rhythm. During my period of training, I was responsible for building hunting boxes,

feeders and hay racks, looking after various facilities in the hunting grounds, and feeding wild animals.

Hunting is not only about shooting. It involves contact, getting to know and understanding nature, taking care of it, helping animals, gaining respect for nature and enjoying the sheer presence in the forest, and benefitting responsibly from its resources.

RAIN

The fabric with polyurethane membrane, lined seams and waterproof zippers insure resistance of the set to the wind and precipitation, not preventing the wicking of moisture from the body.

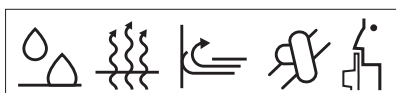

The outer layer fabric tactile, with a hydrophobic finishing.

The set works well in difficult weather conditions, even during intense effort. The functional cut insures comfort and freedom of movement. Inside light net lining.

The jacket has been equipped with 5 fastened pockets and an additional back pocket on the whole width of the back.

Pants with profiled knees, fastened pouches and an elastic in the waist.

Sizes of jackets and pants: S-4XL.

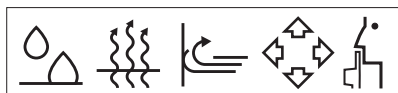

ZEPHYR®
windproof system

ortex
membrane

VOLDA

Soft shell jacket made from three-layered fabric, laminated with an efficient membrane with a hydrophobic finish. Adjustable fixed hood. Effectively protects from wind and chill, retaining warmth by the body. Elevated hood collar protects from wind. Elastic fabric and tailored cut guarantee full freedom of movement. Ventilation openings on the sides of the jacket and on the backs of the sleeves, ensure efficient ZEPHYR® system ventilation. 3 zip pockets. Adjustable drawcord at the bottom. Sizes: XS-4XL.

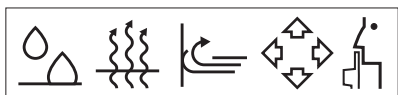

FOREST MEN # LADY

A softshell jacket made of three layered elastic fabric featuring a high quality membrane 15,000/15,000. Hydrophobic finish on the outside. Internal fleece layer. Efficiently protects from wind and chill retaining warmth of the body. Drawcord at the bottom. Velcro regulated cuffs. 2 pockets on the sides and one chest pocket, all fitted with zips. Elastic fabric and tailored cut ensure full freedom of movement. Men sizes: S-4XL. Lady sizes: S-2XL.

BLAST MEN # LADY

Soft shell type vest made of three-layered fabric, with high quality membrane. Efficiently protects from wind and cold, retaining warmth by the body. Elastic fabric and tailored cut ensure full freedom of movement. Men sizes: S-4XL. Lady sizes: XS-3XL.

FALCON BLACK # RED

A shooting vest fitted with a full zip. Designed for right handed shooters. Tailored, ergonomic cut make the vest fit the body perfectly without hindering movement. Mesh fabric ensures appropriate ventilation increasing the shooter's comfort, and lowering the weight of the vest at the same time. 2 capacious pockets for cartridges on the front, with the possibility of widening with snaps and two smaller pockets on the left below the chest. At the bottom in the back flap s a spacious kangaroo pocket. Clips on the back to attach a card with a starting number. Special loops at the the back, at hip height, to hang a towel or earmuffs. Sizes: S-3XL.

WINTER FIRE THERMO

Insulated vest in Fire camouflage. Increases visibility and safety, without attracting the animal attention. Effectively protects from wind, and the insulation provides additional thermal insulation. Cut does not limit movement, openings at the sides with sewn in rubber band. On the front pockets and rubber ammunition carrier bands. Sizes: S-5XL

WINTER FIRE

Vest to be worn over outer clothing increases safety during a group hunt. Fire camouflage is visible to the human eye from a significant distance, even in unfavourable weather conditions, but does not attract the attention of animals. Sizes: L-2XL.

DUCK

Summer vest made of cotton ripstop fabric, on an airy mesh lining. Quilted trimmings made of a durable polyester fabric fitted on shoulders. 3 zip pockets on the front, zip pocket on the back. On the right side a clamp to attach straps. Sizes: S-4XL.

DEER

Zip-up vest made of cotton with addition of Spandex. Airy mesh lining, comfortable loose cut, adjustable waist, large zip-up double pockets, additional flap for ammunition belt. Sizes: XS-4XL.

CASTOR

Warm vest made of faux fur. Protects the trunk well from chill, ensures significant freedom of movement. Pockets to keep hands in fitted with zips, internal pockets designed to hold documents. Ideal to be used either as outer clothing to be worn over a shirt or a jumper, as well as a warming vest worn under a jacket. Sizes: XS-4XL.

REMIGIUSZ WŁODARCZYK

The most titled Polish competitor in the international arena at compak sporting and all-round competitions. According to Gamebore ranking the first rank shooter in the world in Compak sporting.

The most titled Polish competitor in the international arena at compak sporting and all-round competitions. Member of the National Team. A multi-medalist at Polish Championships in categories: Sporting, Compak Sporting, Hunting All-Round, and Olympic Trap.

Awarded four times with the highest hunting style shooting distinction - the diamond laurel. Five-time European Championship medalist at Combined Game Shooting, individual gold medalist at Shotgun Shooting Competition in Rome. Double European Champion of Central Europe at Compak Sporting competition.

More than a dozen times medalist in World Cup rank competitions in compak shooting, the winner of World Championships in Thailand, Singapore, Czech Republic, Hungary and Greece. A runner-up individually and a team Champion in Asia Championships in 2018. According to Gamebore ranking the first rank shooter in the world in Compak sporting. A loving husband, a father of Victoria and Seweryn.

Combined Game Shooting is a discipline which requires a lot of concentration. Trapshooting involves shooting at 100 clay pigeons, in four series with 25 clay pigeons each.

There are two universal traps where the clay pigeons fly out from 5 machines located eleven meters away from competitors. The clay pigeons fly away from the contestants in opposite directions. Next there are two compak shooting stages where the machines are located irregularly and the clay pigeons fly out in different directions rising and falling.

I won the Gold medal at the European Championships in Rome, where 80 competitors from 11 countries took part, and I owe it to my family, especially their support and showing great patience for my passion.

 Short collar. 2 zip pockets on the sides, 2 internal pockets
 and one zip pocket on the chest. Trimmings fitted on the shoulders.
 Cuffs finished with rubber trimmings.
 Sizes: S-3XL.

OSCAR

Thin fleece in khaki colour fitted with a full front zip.
 Short collar. 2 zip pockets on the sides and 2 internal pockets.
 Cuffs finished with rubber trimmings.
 Sizes: S-3XL.

WINDSHIELD

A jacket made of windshield fleece is three times more
 resistant to wind than standard fleece thanks to a special
 construction. Warm pleasant to the touch and resistant to pilling.
 It easily extracts moisture to the outside. 2 zip pockets on the
 sides, 1 internal zip pocket and 1 zip pocket on the chest.
 Sizes: XS-4XL.

Modal - fabric made of a cellulose fiber obtained from wood.

Modal is very delicate in touch. When it is skilfully washed, it does not require ironing.

Thanks to smooth and delicate structure of fiber, it efficiently extracts the moisture from the surface of the skin to the outside. Beech fiber absorbs 50% more moisture than cotton, so it keeps the skin relatively dry and protects our body from exposure to cold or overheating.

In comparison to cotton, Modal is much more pleasant to wear, giving a feeling of freshness while wearing it. „Beech” fabric in comparison to synthetic thermo-active clothing, perfectly extracts the moisture from the surface of the skin, due to special fiber structure.

Moisture extracting is as quick and smooth as in the case of synthetic clothing.

Clothes made of modal are also much more pleasant to wear and maintain freshness for longer than synthetic clothes, which affects the comfort of use.

SAHARA SHORT # LONG

Bright colour and anti-UV finish (UPV20+) make the shirt perfect for summer heatwaves, as it lets through only 5% of UV radiation. Soft and durable fabric with Modal efficiently extracts moisture. Shirt available in short or long sleeve. Sizes: S-3XL.

LENA

Shirt containing Modal, light beige with fine checked pattern. Fabric with UPV 20 filter, protecting from harmful sun radiation. Very pleasant to the touch and durable, efficiently extracts moisture., easy to iron. Foldable sleeves., fastened with side straps, decorative suede details, pockets fastened with loops. Ladies European sizes: 34-48.

VERMONT SHORT # LONG

A very pleasant to the touch flannel shirt made from high quality cotton. White green checked pattern. Men's version features buttoned down collar and a flat chest pocket with a flap on the left. Ladies waisted version features faux pocket on the chest. Men sizes: S-4XL. Ladies sizes: XS-3XL.

MADE OF COFFEE

California thermoactive underwear from Outdoor Pro line is clothing that makes a difference. California underwear is made from nylon fibres created from processed coffee beans in the process of recycling.

CALIFORNIA MEN # LADY

Unique fibre structure creates a natural layer protecting the skin from UV rays. Coffee grounds being a constituent of the fibres, absorb unpleasant odours which are created during an all-day physical activity and ensure comfort of use.

Thanks to a special composition of the fibre, California provides a cooling feel in contact with the skin and absorbs the moisture extracting it to the outside. The addition of Spandex ensures that the underwear fits the body well and retains high elasticity in four directions. Additionally, it has a layer which protects from UV rays.

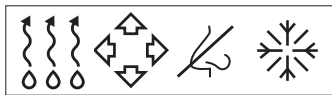

California is available in versions: mens and ladies, which accents the women's figure. The underwear is for all-year use as an outer garment as well as to be worn under a layer of clothing serving as the first layer of insulation. The series comprise of t-shirt, long sleeved shirt, and leggings.

California key features:

- absorbs unpleasant odours and retains freshness for a long time
- stretches in four directions
- extracts moisture efficiently
- protects from UV rays
- environmentally friendly

Composition: 46% nylon Ice-Cafe, 46% polyester, 8% Spandex.

Available sizes: Men: S-4XL. Ladies: XS-3XL.

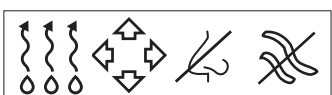

WOODSMEN MEN # LADY

Thermoactive underwear made from double layered yarn containing active ions of silver. Sections featuring higher breathability rate placed where intensive sweating and heat exchange occurs. Seamless anatomical construction, elasticity in all directions ensure optimal fit without constriction, comfort and maximum freedom of movement.

Efficiently extracts moisture from the surface of the skin to the outside, improving the correct thermal regulation of the body. The addition of active ions of silver limits the growth of bacteria, maintaining their amount at skin neutral level.

Men sizes: S-3XL. Lady sizes: S-XL.

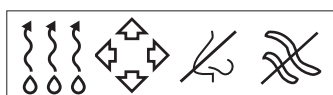

SILVER ONE MEN # LADY

The Silver One collection underwear is made from polyamide with addition of active ions of silver. Thanks to its special structure the fabric extracts the moisture from the surface of the skin to the outside. The ions of silver possess a bacteriostatic feature which impairs the growth of bacteria on the surface of the skin.

The extraction of moisture allows maintaining appropriate body temperature, and maintaining the presence of bacteria on its natural level prevents appearing of unpleasant odour and skin irritation. The Silver One collection underwear is elastic and it stretches in all directions, that is why it doesn't hinder movement despite being adjacent to the skin.

Men sizes: S-3XL. Lady sizes: S-2XL.

SILVER IONS

The ions of silver possess a bacteriostatic feature which impairs the growth of bacteria on the surface of the skin.

SILVER PRO MEN # LADY

Series of thermoactive underwear including long sleeve shirt and leggings. Made from fabric in thick weave, brushed on the inside. Soft internal finish efficiently extracts moisture and additionally insulates thermally. Polyamide yarn with the addition of silver ions limits the growth of bacteria on the surface of the skin. The underwear recommended specially for the autumn-winter period.
Men sizes: S-3XL. Lady sizes: S-2XL.

modal

HALS MEN # LADY

Short sleeve polo T-shirt available in honey and green colour. Decorative details in a contrastive colour. Durable jersey with Modal, efficiently extracts moisture from the surface of the skin to the outside. Composition: 60% Modal, 40% polyester.
Men sizes: S-4XL. Lady sizes: XS-3XL.

BOWER

Elegant ladies blazer made from high quality beige fabric, dark trimmings finish. Composition: 80% wool, 20% polyester. Faux antler buttons. Sizes: A from 36 to 40; B from 36 to 48.

DIANA

Elegant ladies cape. High quality beige fabric. Decorative collar with buttons in contrastive brown colour. Wrinkles lay softly on the body. Universal size.

PIRX

Insulated ear flap hat, efficiently protecting your head from chill, wind and rain/snow falls. Outer shell with membrane, strong thermal insulation and pleasant to the touch finish made of faux fur. Available sizes: 55-62 cm.

HUGO

The outer fabric of the flat hat is warm, durable and pleasant to the touch. The top of the flat hat as well as the ear flaps are insulated with thin quilt on the inside. A decorative metal pin showing wild geese in flight fitted on the side of the flat hat. Sizes: 54-61 cm.

GOLF

Summer flat hat matching IRON set. Made from H300 fabric. Sizes: 54-62 cm.

IRON CAP

Cap supplements the IRON set. Available in brown and 3DX camouflage. Adjustable strap with a buckle at the back. Sizes: M-XL.

ORANGE SCARF

Scarf made of a soft, warm orange fleece. Length: 150 cm; Width: 16.5 cm

RAIN HAT

Convenient hat made of fabric matching Rain, Gomera Pro Brown and Arctic Pro sets. Fabric with membrane, ear and neck protector, fleece insulated, hidden inside. Sizes: 55-62 cm.

PERTH HAT

Universal hat in olive colour. The hat maintains the shape thanks to stiffeners and stitches around the brim. Sizes: 55-62 cm.

VALLEY GREEN # ORANGE

Multifunctional microfibre scarf in orange or green colour with a brand logo. Extracts moisture efficiently. Useful in various situations both in summer and winter. In just a few movements you can form a hat, scarf, band, balaclava etc. out of it.

SUMMER PRO

Summer socks, combining the advantages of cotton, Coolmax fibres and lycra. Very elastic, the socks ensure optimal fit without applying excessive pressure. Quick extraction of moisture from the surface of the foot. Recommended for use with boots fitted with membranes in summer period.

UNI LINE

All year socks, on the inside partly finished with frotte fabric. The socks extract moisture well. Recommended during active rest and long term field work especially with shoes fitted with a membrane. A combination of cotton, Coolmax and Lycra. A pattern of wood grouse is woven on the side.

UNI PRO

All year socks, on the inside finished with frotte fabric. Specially designed areas fitted in mid-foot and ankle enable improved fit of the sock. Non-pressure band. Socks combine the advantages of cotton Coolmax nad Lycra. Work well in shoes fitted with a membrane. A pattern of hare is woven on the side.

PRO LINE

Warm winter socks, combining the advantages of merynos wool, Thermolite fibres and lycra. The socks insulate thermally well and extract moisture from the surface of the foot. Recommended for use with boots fitted with membranes. A pattern of a deer head is woven on the side.

WINTER HIGH

Above-the-knee height winter socks. A wide cuff keeps the sock in place well without applying excessive pressure on the calf. A combination of the advantages of merynos wool, Thermolite fibres and lycra. The socks insulate thermally well and extract moisture to the outside. Recommended for use with boots fitted with membranes. A pattern of a boar's head is woven on the side.

European sock sizes: 35-38, 39-42, 43-46.

SMART BROWN # 3DX

Gloves are fitted with fold-away mittens which may be attached to the back of the hand. Such solution allows for combining the possibility of high performance with efficient protection from bitter frost. Available in brown colour and 3DX camouflage. Sizes: 22-26 cm.

ARCTIC

Warm gloves, matching the Arctic Pro and Gomera Pro Brown sets. Special cut allows for combining comfort of use with effective protection from cold. Soft fleece lining inside, inner trimmings provide firm grip and resistance to damage. The index finger side seam hides an opening which allows handling the trigger precisely. European sizes: 7-11.

PRIME

Lightweight gloves effectively protect from wind and cold. Three-layered fabric with membrane and thin fleece finish on the inside. Leather trimmings fitted on places prone to tear. Possibility to stick out a finger through a special hole. Sizes: 22-26.

IRON RUCKSACK 3DX # BROWN

Comfortable hunting rucksack. Long opening provides easy access to the inside of the rucksack. 30 litres capacity with possibility to increase to 38 litres. Spacious and durable external mesh pockets. Anatomically formed shoulder straps, profiled stiffened back guarantees maximum comfort and back ventilation.

SUMATRA

Hunting 28l capacity backpack. Made of Cordura fabric; fitted with SAS Ergonomic zips, Duraflex buckles, ACS suspension system. Weight 115kg. Fitted with chest strap and detachable waist belt.

FORMOZA

Hunting 40l capacity backpack. Made of Cordura fabric; fitted with SAS Ergonomic zips, Duraflex buckles, ACS suspension system. Weight 17kg. Backpack fitted with chest strap and profiled waist belt. Expandable compartment additionally increases backpack capacity.

TRAIL

Game drag made of a durable orange strap, 2,5 cm width. Enables dragging hunted game. Fitted with a hand loop and stainless steel hook. Convenient pouch with a drawcord and a carabiner to transport and storage.

TRAIL PLUS

Game drag made of a durable orange strap, 2,5 cm width. Enables dragging hunted game by 1-3 people. Fitted with 2 hand loops and 1 shoulder loop. Stainless steel hook. Convenient pouch with a drawcord and a carabiner to transport and storage.

MULTITRAIL

Multifunctional hunter's set made of a durable orange strap, 2,5 cm width. Enables dragging hunted game by 3 people at the same time. Fitted with 2 hand loops and 1 shoulder loop. Stainless steel hook on a swivel prevents twisting of the strap. Possibility of using the strap as a lead for 1-3 dogs or a strap worn over a shoulder to carry game bird straps. Convenient pouch with a drawcord and a carabiner to transport and storage.

PEAK SHOOTING REST BAG

Shooting rest bag which may be hung over a railing. Allows for comfortable gun positioning, prevents from scartching the rifle. Fitted with 3 separate zip pouches which are to be filled with rice or beans. Upper part dimensions (length x width x height): 13,5 x 9,5 x 6,5 cm. Overall height 14cm.

FLAME

Reusable hand warmer. Manufactured from non toxic solution of salt, ensuring the safety of use. Maximum temperature of the hand warmer is +54°C. It warms your body when it is kept for example in hands or near the chest. Dimensions: 9,5 x 10 cm.

GEAR THERMAL MUG

A combination of a vacuum bottle and a thermal mug. Volume 400ml. Easily opened by pressing the button, air-tight seal. Vacuum walls made of stainless steel. Designed for car cup holders.

CAR WEAPON CASES

Felt gun cases designed to transport weapons in a car, suspended on front headrests. Width 120cm, sewn on zippered pockets, combination padlocks on both sides. Available in two versions: holding one or two guns.

IRON PROTECTORS

Gaiters protect the space between the leg and boot from snow, water and mud. Fabric with Ortex membrane. Front zip covered with a flap, hook to attach to laces. Regulated strap to fasten under the shoe. Drawcord at the top to adjust girth. Available in three versions: (3DX, Fire, Olive). Universal size, front length: 40cm.

THERMAL INSULATING SEAT

Lightweight, foldable thermal insulating seat pads. Unfolded size 42x26cm. Soft filling featuring high insulation parameters. Rubber band, convenient latch allows strapping the pads to a rucksack or belt loop. Fabric with a membrane in 3DX or Fire camouflage.

VISION BINOCULARS HARNESS

Binocular harness made of orange or green rubber. Worn on the back, adjustable to fit the body. Dark green binoculars strap included, fastened to the harness with carabiners.
