20 years have passed since Tagart brand designed their first piece of hunting clothing. Since the very beginning of our existence we have been striving to make our clothes feature high comfort of use and precise finish.

Today we are proud to admit that our vast experience and passion is reflected in the design of clothes which meet very strict requirements of hunting clothing. Innovative technological solutions, best quality materials and following

modern fashion trends allow our products to be appreciated among people hunting in all parts of the world.

Join them by choosing Tagart brand. Follow nature!

ZEPHYR
 Regulated ventilation system, works with the user

FLEX
 Wide hood adjustment system. Maximum comfort, minimum constraints.

TECHNOLOGIES

OUR SOLUTIONS

The system provides maintaining appropriate micro climate at a very high level. Now, thanks to ZEPHYR system not only do you have efficient ventilation at your disposal, but also you may adjust its intensity to your current needs. The driving force of ZEPHYR ventilation is the user's movement. Regulated ventilation slits are placed in such a way, that with every move air is sucked into areas which are most prone to sweating. In case of jackets, air slits are situated on the sides. The system is complemented with regulated outlet openings, fitted on the back of the sleeves. Trousers are fitted with ventilation slits on inner thighs. While walking, the slits act as inlet and outlet of airflow.

High collar hood makes carrying weapons easy as it does not fall flat on the shoulders. Front drawcord allows for adjusting the girth to the shape of user's face, providing optimal protection, even in adverse weather conditions. Horizontal depth regulation provides good fit at the back of the hood, and a special profile allows for exposing ears. FLEX hood firmly holds on the head. Without limiting the range of sight it makes orientation in the field easier. Independent peak protects the eyes from rain and wind. When necessary the hood may be detached from the jacket.

Despite wide availability of synthetic insulation materials, we take advantage of natural down insulation in particular products. Delicate natural down, featured by water fowl, contains as much as 1 million feathers per 1kg. The down which we use comes from Polish goose farms, which are considered to be among the best in the world. Apart from excellent thermal-insulating properties, down is a perfect heat conductor. Thanks to a high level of heat capacity we experience the warmth almost instantly. High quality down retains its proprieties for many years. After being compressed numerous times it returns to its original shape.

Clothes designed for difficult weather and terrain conditions are fitted with polyurethane membranes, in most cases implementing additional taped seams. After adding waterproof zips we can guarantee waterproof and windproof properties while maintaining the highest rate of breathability. Because of the nature of use we pay attention to make the layers of the set as silent as possible.

Most of our shirts are produced from cellulose fibres, sourced from the wood of deciduous trees. Fabrics containing modal are very pleasant to the skin and touch, resistant to pilling. Modal fibres can absorb about 50% of moisture more than popular cotton. Thanks to a smooth surface of fibres it retains its softness and elasticity even after being washed numerous times, providing appropriate maintenance has been observed.

THUNDER THERMO

Thunder set, additionally insulated with 3M™ Thinsulate™ fabric, is perfect for mild winter. Efficient polyurethane membrane, taped seams. Effectively protects from wind, chill and rain- snow falls, while retaining light weight and maximum freedom of movement. Fire camouflage trimmings fitted on shoulders, improving safety during the hunt. The ZEPHYR ventilation system and FLEX hood are used in the set. Available sizes: S, M, L, XL, 2XL, 3XL.

THUNDER 3DX

Lightweight transitional set in a three dimensional 3DX camouflage, suitable for difficult terrain and changeable weather conditions. Fabric fitted with a membrane, taped seams. High-tech materials allowed for weight reduction, while retaining the highest parameters of use. The DWR hydrophobic finish allows for better moisture distribution from the surface of the fabric and enhances functionality while approaching the prey. The ZEPHYR ventilation system and FLEX hood are used in the set. Available sizes: XS, S, M, L, XL, 2XL, 3XL, 4XL.

REFLEX HATS

Hat fitted with retractable ear flaps, made from fabric in 3DX camouflage, green fleece with a membrane or soft fabric known from Gomera Classic set. Adjustable drawcord at the back. The top of the hat may be turned over to the other side in bright orange colour. The hat significantly increases safety during the hunt. Available hat sizes: S (<= 54 cm), M (55-56 cm), L (57-58 cm), XL (59-60 cm), 2XL (>= 61 cm).

3M™ Thinsulate™
 Warmth without additional weight and volume - this has been the motto of Thinsulate™ insulation for more than 30 years. The use of very fine fibres allows for binding larger amount of air particles. Lightweight and thin insulation provides thermal comfort, without limiting the comfort of use.

3DX CAMOUFLAGE

Photo realistic, four-level, three dimensional Beyondvision 3DX camouflage has been designed with greatest attention to detail. The detailed pattern incorporates eight tones including oak and birch stems, branches and leaves, pine branches with needles. Such pattern allows for blending in with the surrounding during various seasons. The print has been made using a technology which increases resistance to external factors.

ARCTIC PRO

An improved version of Arctic Jacket with down insulation. Designed to ensure the highest comfort in difficult winter conditions. Laminated outer shell with high quality membrane, taped seams and waterproof zips efficiently protect from rain/snowfall and wind. Natural down insulation from Polish geese is stored inside small double layered compartments which are independent from the outer shell fabric. It guarantees thermal comfort in a wide range of temperatures and limiting weight at the same time. ZEPHYR ventilation system allows for adjustable ventilation where and when it is necessary. Functional and comfortable cut, with numerous pockets situated conveniently.

TROUSERS:

- fabric with a membrane and taped seams
- goose down insulation inside
- ZEPHYR ventilation system, openings at the internal side thighs
- at the bottom of the leg long cuffs with adjustable band
- five pockets (two at the back, two at the front, one fitted on thigh)

JACKET:

- durable outer shell with efficient membrane and taped seams
- goose down insulation inside a layer independent from outer shell
- ZEPHYR ventilation system, openings at the sides of the jacket and back of the sleeves
- the jacket does not raise while putting hands up
- elevated collar, soft finish on the inside
- detachable, high FLEX hood, adjustable circumference and depth
- pocket fitted on the sleeve containing hi-vis band
- adjustable circumference of cuffs, waist and bottom of the jacket

PIRX EAR FLAP HAT

Insulated ear flap hat, efficiently protecting your head from chill, wind and rain/snow falls. Outer shell with membrane, strong thermal insulation and pleasant to the touch finish made of faux fur. Available sizes: 55, 56, 57, 58, 59, 60, 61, 62 cm.

ARCTIC GLOVES

Warm gloves, matching the Arctic Pro and Gomera Pro Brown sets. Special cut allows for combining comfort of use with effective protection from cold. Soft fleece lining inside, inner trimmings provide firm grip and resistance to damage. The index finger side seam hides an opening which allows handling the trigger precisely. European sizes: 7, 8, 9, 10, 11.

ARCTIC PRO

PIRX

GOMERA CLASSIC MEN
GOMERA CLASSIC LADY
GOMERA PRO 3DX
GOMERA PRO BROWN

Insulated winter set, which thanks to a comfortable cut and high durability, has been a favourite among our customers. It is fitted with numerous pockets. Regulated cuffs, waist and braces length. Adjustable and foldable hood which may be hidden in the collar. The sides of the jacket may be opened to make sitting down easier. Trousers with an elevated back and braces. FOX

Warm jumper made of a high quality fleece, a zip is fitted on all length. three zip pockets and additional internal zip pocket. Adjustable waistband. Sizes: S, M, L, XL, 2XL, 3XL.

FIRE FLANNEL SHIRT

Comfortable flannel shirt combining mellow shades of red, brown and orange. Traditional cut, chest pocket. Softened fabric, durable and pleasant to the touch, featuring the advantages of cotton (70%) and polyester. Sizes: S (37/38), M (39/40), L (41/42), XL (43/44), 2XL (45/46), 3XL (47/48), 4XL (49/50), 5XL (51/52).

OAK FLANNEL SHIRT

Flannel shirt with a fine check pattern in typical hunting colours. Softened fabric, durable and pleasant to the touch. Chest pocket on the right side. Faux antlers buttons. The fabric features the advantages of cotton (70%) and polyester. Sizes: S (37/38), M (39/40), L (41/42), XL (43/44), 2XL (45/46), 3XL (47/48), 4XL (49/50), 5XL (51/52).

SAHARA SHORT, LONG

Bright colour and anti-UV finish (UPV20+) make the shirt perfect for summer heatwaves, as it lets through only 5% of UV radiation. Soft and durable fabric efficiently extracts moisture. Shirt available in short or long sleeve. Sizes: S (37/38), M (39/40), L (41/42), XL (43/44), 2XL (45/46), 3XL (47/48).

Modal is a high-tech cellulose fibre, produced from the wood of deciduous trees. It is very pleasant to the touch and skin-friendly. It can absorb about 50% of moisture more than cotton. Thanks to a smooth surface of fibres, the fabric retains its characteristic softness and elasticity, even after several washes.

VERMONT SHORT, LONG

Long and short sleeve shirts, made from high density fabric containing Modal fibres. Very pleasant to the touch, spacious structure. Green and black colour blend. A decorative suede patch on the chest pocket. Sizes: S (37/38), M (39/40), L (41/42), XL (43/44), 2XL (45/46), 3XL (47/48).

ROE BUCK MEN ROE BUCK LADY

Elegant white cotton shirt. Roe buck head stitched on the placket and faux antlers buttons provide distinctive hunting features. Durable fabric. Composition: 100% cotton. Men sizes: -height: 164-170, 170-176, 176-182, 182-188, 188-194 cm; collar: from 39 to 46cm (every 1 cm). Ladies European sizes: 34, 36, 38, 40, 42, 44, 46, 48.

BARIBAL

Shirt fitted with soft lining in check pattern. Outer layer is made from a durable cotton „Ripstop“ type fabric. Chest pocket with a flap. Reinforcement from brown suede sewn on the right shoulder. Sizes: S, M, L, XL, 2XL, 3XL, 4XL.

BARIBAL

CALIFORNIA MEN, CALIFORNIA LADY

Summer T-shirt, which may be used as a regular T-shirt or as a thermoactive under shirt. When folded takes up very little space. The composition comprises of nylon fibres sourced from processed coffee beans (46%). The addition of Spandex (8%) and special weave make the T-shirt particularly elastic and it stretches in all directions. Thanks to unique fibres the T-shirt dries very quickly, protects from UV rays, limits the appearance of unpleasant smell and cools the body. Available in MEN and LADY, beige or olive colours. MEN sizes: S, M, L, XL, 2XL, 3XL, 4XL; LADY sizes: XS, S, M, L, XL, 2XL, 3XL.

modal

TREE MEN, TREE LADY

Series of underwear made of durable and elastic high density yarn, with Modal as dominating component. Very pleasant to the body, efficiently absorbs and extracts moisture to the outside. The series include long sleeve shirt and leggings available in Men and Lady versions. Men sizes: XS, S, M, L, XL, 2XL, 3XL; Lady Sizes: S, M, L.

modal

1. GEAR THERMAL MUG

A combination of a vacuum bottle and a thermal mug. Volume 400ml. Easily opened by pressing the button, air-tight seal. Vacuum walls made of stainless steel. Designed for car cup holders.

2. AMMUNITION BELT

10 cm width belt, holding 25 cartridges. 3DX camouflage fabric. Soft filling, regulated waist, durable materials.

3. IRON RUCKSACK

Comfortable hunting rucksack, with 3DX camouflage inserts. Long opening provides easy access to the inside of the rucksack. 30 litres capacity with possibility to increase to 38 litres. Spacious and durable external mesh pockets. Anatomically formed shoulder straps, profiled stiffened back guarantees maximum comfort and back ventilation.

4. CAR WEAPON CASES

Felt gun cases designed to transport weapons in a car, suspended on front headrests. Width 120cm, sewn on zipped pockets, combination padlocks on both sides. Available in two versions: holding one or two guns.

5. THERMAL INSULATING SEAT

Lightweight, foldable thermal insulating seat pads. Unfolded size 42x26cm. Soft filling featuring high insulation parameters. Rubber band, convenient latch allows strapping the pads to a rucksack or belt loop. Fabric with a membrane in 3DX or Fire camouflage.

6. RELAX DOG BED

Double sided dog bed with 3DX camouflage fabric. Zippered, easy to maintain outer shell. Polyurethane granular filling contained in ligofil interlining. Available with brown or green edging. Sizes: L (70x55 cm), XL (90x70 cm), 2XL (110x80 cm).

7. CALM DOG BED

Double sided dog bed with elevated rim, 3DX camouflage fabric. Removable, easy to maintain shell. Polyurethane granular filling contained in ligofil interlining. Available with brown or green edging. Sizes: L (100x85 cm), XL (120x85 cm).

8. IRON PROTECTORS

Gaiters protect the space between the leg and boot from snow, water and mud. Fabric with Orttex membrane. Front zip covered with a flap, hook to attach to laces. Regulated strap to fasten under the shoe. Drawcord at the top to adjust girth. Available in three versions: (3DX, Fire, Olive). Universal size, front length: 40cm.

membrane

AKU- is a leading Italian producer making high quality hiking boots. The history of the company is based on many years of experience in the prestigious handcrafting of footwear. The company is renowned for introducing an innovative method of fusing the Gore-Tex® membrane to produce fully water resistant footwear. Despite referring to tradition and local inspirations, AKU aims at active development and strives to strengthen its position on subsequent markets. Currently, the company runs two large factories which produce 200 thousand pairs of shoes annually with worldwide distribution.

ZENITH II GTX

Resistant to damage, lightweight boots designed for all-day trekking use in various conditions. The upper is made of oiled 1.8mm nubuck, secured with a rubber rand. Waterproof Gore Tex® membrane lining. Vibram® Plume Hiking Eva sole provides secure grip and reduces abrasion. The IMS system stiffens the sole absorbing the irregularities; the Harmonic Lasting system provides optimal boot geometry fit, reducing the chance of grazing. Polyurethane injection molded midsole, nylon stiffening 4-6mm insole with micro porous material. A pair of 42 size boots weighs 1320g. Available sizes: 39-45.

CONERO NBK GTX

Durable hiking boots, medium hardness, made from high quality 1.8mm nubuck. Water resistance is guaranteed by Gore Tex® membrane. Nylon stiffened 4-6mm Vibram® Fourà EVA insole provides appropriate grip and control in various terrain conditions, reduces the feeling of terrain unevenness. Securing rubber rand around the whole boot, stiffened heel. A pair of 42 size boots weighs 1310g. Available sizes: 39-45.

SLOPE GTX

Strong soft hiking boots, one of the lightest in their category. This model has been produced for 25 years, but constantly improved. Especially recommended for long-lasting activities out in the open, connected with work or active leisure. The upper is made from suede leather, lightweight and durable AIR8000® material. Water resistance is guaranteed by Gore Tex® Performance Comfort membrane. Appropriate grip, even on slippery surfaces, is guaranteed by Vibram® Erica Everest sole. Insole: Custom Fit 152, midsole Die Cut Eva. Size 42 weighs 1050g. Available sizes: 36-47.

TRIBUTE II GTX, TRIBUTE II GTX WOMEN'S

Medium hard hiking boots, available in men and ladies versions. The upper is made of high quality 2mm leather featuring high resistance to mechanical damage. Lining with Gore Tex® Performance Comfort ensure water resistance without limiting the extraction of moisture. Vibram® Sendera sole guarantees perfect grip on various types of surfaces. Removable Eva insole, thermoplastic polyurethane finish. Very lightweight. A pair of 42 size men boots weighs 1300g. Available sizes: MEN 39-45; LADIES 36-39.

NEMES FG GTX

Lightweight casual shoes designed for a wide range of use. They ensure high comfort of use while hiking out in the open, urban and leisure usage. Made from 1.8mm grain leather. Water resistant thanks to Gore Tex® Performance Comfort membrane. Vibram® Mega Grip sole ensures perfect grip. Eva lining, formed Eva midsole and 1.5mm nylon. A pair of 42 size men shoes weighs 940g.

BELLAMONT SUEDE GTX

BELLAMONT SUEDE GTX

Lightweight all-purpose casual shoes, suitable for various types of activities, also for urban environment. The Bellamont model is finished manually, and each pair is marked with a unique cobbler's sign. Made from high quality nubuck, leather lining. Gore Tex® Performance Comfort membrane ensures high rate of water resistance, Vibram® Predator II Ecostep sole provides proper grip, and IMS1 midsole guarantees comfort of everyday use and appropriate feel of the ground. Toe and heel are fitted with rubber reinforcement. Eva insole, Double Density Die Cut Eva midsole of two densities. A pair of 42 size shoes weighs only 860g.

THERMOACTIVE SOCKS

1. SUMMER PRO

Summer socks, combining the advantages of cotton, COOLMAX fibres and lycra. Very elastic, the socks ensure optimal fit without applying excessive pressure. Quick extraction of moisture from the surface of the foot. Recommended for use with boots fitted with membranes in summer period.

2. UNI LINE

All year socks, on the inside partly finished with frotte fabric. The socks extract moisture well. Recommended during active rest and long term field work especially with shoes fitted with a membrane. A combination of cotton, Coolmax and Lycra. A pattern of wood grouse is woven on the side.

3. UNI PRO

All year socks, on the inside finished with frotte fabric. Specially designed areas fitted in mid-foot and ankle enable improved fit of the sock. Non-pressure band. Socks combine the advantages of cotton, Lycra and spandex. Work well in shoes fitted with a membrane. A pattern of hare is woven on the side.

4. PRO LINE

Warm winter socks, combining the advantages of merynos wool, THERMOLITE fibres and lycra. The socks insulate thermally well and extract moisture from the surface of the foot. Recommended for use with boots fitted with membranes. A pattern of a deer head is woven on the side.

5. WINTER HIGH

Above-the-knee height winter socks. A wide cuff keeps the sock in place well without applying excessive pressure on the calf. A combination of the advantages of merynos wool, THERMOLITE fibres and lycra. The socks insulate thermally well and extract moisture to the outside. Recommended for use with boots fitted with membranes. A pattern of a boar's head is woven on the side. European sock sizes: 35-38, 39-42, 43-46.
